

REVO XL TUNABLE WHITE DMX

The Revo XL Tunabe White DMX is a unique, configurable LED lighting fixture that offers designers new possibilities for creating stunning visuals. This two-section fixture can be controlled separately, allowing for different light colours and beam angles on each side. The Tunable White LED modules allow for seamless adjustment of the white point from warm to cool, giving designers even more control over their lighting schemes. The durable CNC-cut aluminium housing is IP67 rated for outdoor use, and features a ventilation gland with Gore-Tex membrane to prevent condensation.
