

REVO XXL COLOURFLOW DMX

With the Revo XXL ColourFlow DMX, lighting designers have never had so many possibilities. Whether you want two different colours in each section, or four different types of light, this light fixture can do it all. Plus, with individual control over each section, you can create truly unique lighting effects that will set your design apart from the rest. For example, choose two RGBA sections for deeply saturated colours in combination with two white light sections for high quality white light. Or choose four RGBW sections for powerful coloured light.
