

REVO XXL TUNABLE WHITE DMX

With the Revo XXL Tunable White DMX, lighting designers have never had so many possibilities. Whether you want two different temperatures of white light in each section, or four different types of light, this light fixture can do it all. Plus, with individual control over each section, you can create truly unique lighting effects that will set your design apart from the rest. For example, choose two 1800-4000K sections for a very warm white look, and two 2700-5700K sections for an extremely large Tunable White range.
