

FOCUS MICRO G2 EXTENDED

The most compact, but fully equipped, zoom fixture available. With a diameter of 16 mm, the Focus Micro G2 is about the size of an AA battery. The design makes the Focus Micro virtually invisible and unobtrusive, without compromising on functionality. Besides the zoom range of no less than 6° to 90°, some key features are high quality LED light sources with a Colour Rendering Index of ~95 and a choice of four different colour temperatures and control methods.
