> About CLS

CLS is a Dutch manufacturer of high-quality LED lighting solutions. With **over 35 years' experience** in the world of professional lighting, and 20 years of expertise in LED production, we are a trusted partner for the demands of today's market. Our fixtures provide the perfect solution for every project thanks to customised configurations and the use of the finest components available.

One of CLS's key areas of expertise is the development and production of lighting for hotels and restaurants worldwide. Working closely with international lighting designers, we have created a wide range of LED fixtures whose specifications and applications are perfectly tailored for both indoor and outdoor use, allowing the creation of any desired atmosphere and experience.

> Designed for Atmosphere and Experience

Whether it's a warm, inviting welcome in the hotel lobby, a stylish ambience in the restaurant, or functional yet atmospheric lighting in the guest rooms: lighting sets the pace and tone of every space.

Highlighted areas:

- > Entrances and lobbies
- > Restaurants, bars and cafés
- > Guest rooms and suites
- > Spas and wellness areas
- > Exterior façades and terraces
- > Meeting rooms and function halls

Our fixtures are available in a wide range of designs: from minimalist downlights and wall fixtures to powerful spotlights and recessed solutions – all equipped with high-quality dimming options and excellent colour rendering.

> Sustainability

At CLS LED, we believe in contributing to a better world and a cleaner planet. Given the sector in which we operate and the products we provide, we can make a positive difference with every project in which our products are used.

The modular design of our fixtures makes it possible to integrate different options into a single design, creating the perfect solution for each project with easily replaceable parts. With an average lifespan of 50,000 hours, replacements and repairs are minimised, reducing the use of natural resources, materials, energy, and maintenance costs. Total cost of ownership (TCO) is further reduced thanks to our 5-year warranty on fixtures and 10-year after-sales guarantee on parts.

> Discover the Difference with CLS LED

In the world of hospitality, it's all about experience. The first impression starts at the entrance – and lighting plays a decisive role. Light influences how guests feel, how spaces come to life, and how memories are formed. With CLS LED's innovative solutions, you can create an atmosphere that reflects your brand, style, and hospitality concept – from boutique hotels to international chains, from intimate restaurants to high-end rooftop bars.

Our fixtures offer great design freedom with a wide range of beam angles, dimming options and light colours available across the CLS portfolio.

> Smart Control for Maximum Flexibility

Lighting needs to be adaptable. That's why all our fixtures are compatible with advanced control protocols.

DMX512 enables sophisticated scene programming for bars, event spaces or outdoor lighting projects.

Casambi offers wireless, intuitive control via smartphone or tablet – ideal for hotels that want flexibility without major installation changes.

DALI integrates easily with existing building management systems and centralised lighting control.

Whether it's fixed lighting, subtly changing colour temperatures or interactive light art – with CLS LED you always retain full control.

> Tunable White, RGB-A and RGB-W

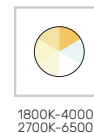

CLS LED offers fixtures in many forms – from minimalist downlights to powerful spotlights – all with advanced dimming options and outstanding colour rendering (CRI > 95). But the real difference lies in our LED colours:

RGBW & RGBA – For vivid, atmospheric colour effects. While RGBW combines bright, pure white with colours, RGBA provides deep, richly saturated tones with a warm undertone – perfect for creating unique ambiances in bars, lobbies, or themed spaces.

Tunable White – Adjust the colour temperature from cool daylight (6500K) to warm candlelight (1800K), matched to the time of day or the desired mood. Start the morning fresh and bright, then end the evening with a cosy, relaxing atmosphere.

Dim To Warm – The light naturally becomes warmer as it dims, creating an intimate, atmospheric look. Ideal for restaurants, wellness areas or lounges where comfort and ambience are key.

With CLS LED you combine technical flexibility with aesthetic refinement – lighting that is not only functional, but also strengthens the identity and hospitality of every hotel or restaurant.

> Tailor-Made Solutions – 100% Dutch Manufacture

All fixtures are developed and produced in the Netherlands. This allows us to guarantee the highest quality, ensure short lead times, and deliver bespoke solutions that fit your project perfectly.
